# DEEP FREEZERS

## POWERFUL COOLING, ADVANCED TECHNOLOGY!

**PENTACOOL TECHNOLOGY:** Godrej Edge Penta Deep Freezer comes with **5 side cooling coils**, including the base to provide uniform and faster freezing. The additional PUF insulation at the bottom provides higher cooling retention and a quick pull-down time.

**D-COOL TECHNOLOGY:** Unlike regular deep freezers, Godrej Deep Freezers come with **D-shaped cooling coils** instead of 'O' type cooling coils.

| More surface contact | Large heat exchange area | High refrigeration efficiency

**CONVERTIBLE TECHNOLOGY:** The entire range of Godrej Edge Penta Deep Freezers is convertible and offers a temperature range of  $-25^{\circ}\text{C}$  to  $8^{\circ}\text{C}$ . This allows the storage of a variety of items such as frozen food, ice creams, beverages and more, giving users the flexibility to use the machine as a **freezer or a cooler**.
